

**American Society of Gas Engineers
Combustion Gas Engineers Handbook**

TABLE OF CONTENTS

Chapter	Title	Page
1	Gaseous Fuels - Basic Information	1
2	Gaseous Fuels - Their Physical Properties and Characteristics	13
3	Operational Safety and Fuel Handling	25
4	Combustion Chemistry	29
5	Combustion Stability	39
6	Normal and Abnormal Combustion and Combustion Parameters for Non-Premix Burners	51
7	Burner Operation Characteristics	65
8	Ignition and Transient Considerations	83
9	Gas Flow	85
10	CO ₂ Versus Efficiency	95
11	NO _x Considerations	99
12	Components Used in Gas Appliances	103
13	Flue and Vent Criteria	121
14	Environmental Considerations	127
15	Ethics, Standards, and Certification	137
16	Regulatory Considerations	139
17	Thermodynamics, Heat Transfer, Thermal Conductivity, and Thermometry	147
18	Combustion System and Trouble Shooting	151
19	Glossary	155
